

A large, stylized teal wave graphic that curves from the bottom left towards the top right, framing the text.

# Mist

Outlet Corporation (Group 20)

# Roles

Joey Luong	Project Manager & Full-Stack Programmer
Harrison Baker	Technical Manager & Front-End
Huy Nguyen	Full-Stack Programmer
Jon Kraft	Back-End Programmer
Eric Liao	Back-End Programmer

# About Us

- We serve to allow users to search and browse a variety of games in our game library through a web browser.
- Users can chat and create discussions through our online community forums.
- Publishers can also publish their own games alongside our expanding library.

# Requirements/Features

## Game Store

1. Allows users to find games by search.
2. Allows users to sort games by category and date.
3. Allows users to create an account to log in and sign out.
4. Allows account users to request publishing games.
5. Allows administrators to publish game requests.

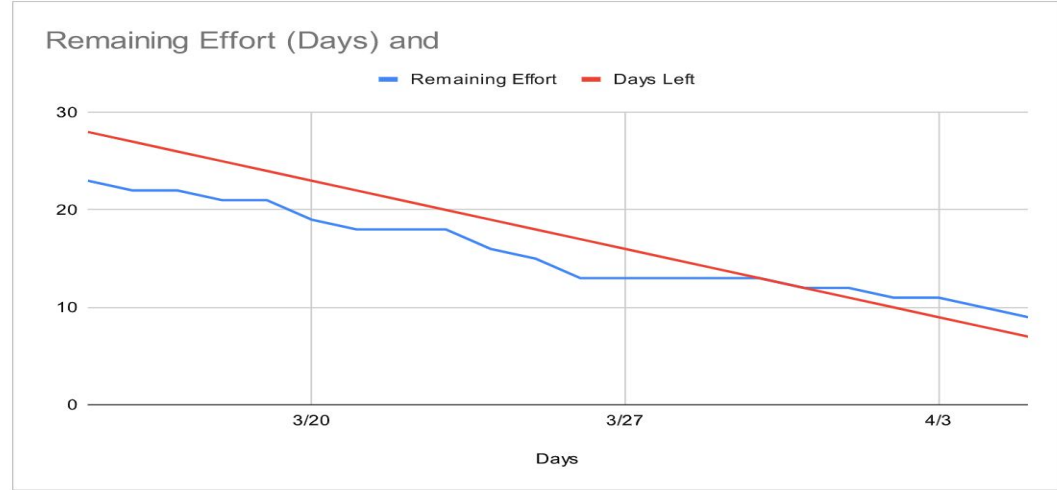

## Community Forum

6. Allows account users to make posts on forums.
7. Allows moderators to moderate user forums.
8. Allows account users to like/dislike posts.
9. Allows users to find posts by search.
10. Allows users to sort posts by likes and date.

# Other Facts

- Pure HTML, CSS, PHP and SQL.
- NO addons used.
- NO libraries used.
- All assets and images are made in-house.
- All code written from scratch.
- Keep It Simple, Stupid.
- This presentation would've been on Miami's CEC Linux server but the PHP is isn't working today. It was just working yesterday, but our SQL server still works.
- But we used the free resources offered at Miami with CEC's Linux Server and the FSB's SQL Server.
